

AI Audit Report

Student: nakhoa232@clc.fitus.edu.vn Scenario: D Execution dates: 2026-07-30 to 2026-07-31

AI-assisted work

Activity	Tool / skill	Result	Human verification
Interpret assignment and plan Scenario D	Codex	D1–D4 workflow and deliverables	Student chose to exclude Task 2
Apply usability heuristics	Codex + ux-heuristics	Eleven findings: five severity-3 and six severity-2	Findings tied to live observations and measurements
Operate live EMS	Codex + Browser	Request #33 executed user→Admin→user	Screenshots and state transitions retained
Create upload input	ImageGen	Neutral PNG test asset	Clearly separated from EMS evidence
Organise submission artefacts	Codex	Checklist, reports, logs, compatibility matrix	Pending cells remain explicit
Create reusable workflow	Codex + skill-creator	ems-scenario-d-testing skill and validator	Validator executed locally
Expand Windows coverage	Codex + Browser	Contrast/reflow measurements and D2/D3 state-persistence tests	Inconclusive keyboard/Export checks remained Pending
Finish supported automation	Codex + Browser	D1–D4 localization/reflow/contrast, alert timing, signed-out callbacks	Unsupported network/download/keyboard checks were not inferred

Integrity controls

- No participant, SUS, or UEQ-S data was generated.
- No macOS, Linux, Safari, Firefox, Edge, Opera, tablet, or phone result was inferred from Windows Chromium.
- No finding was submitted to Google Form.
- Generated test assets are labelled as inputs and are not presented as screenshots.
- Every Pass requires an observed state; unexecuted cells remain Pending.
- The group's original checklist-generation prompts were not reconstructed because they are absent from the workspace.

Prompt record

The available user prompts are preserved verbatim in AI-Prompts.md. The complete AI output remains in the exported Codex task and should accompany the submission if verbatim output is required.

Limitations

The AI cannot manufacture genuine multi-platform evidence or recover missing prompt history. Severity and final submission decisions remain subject to student review.
